

E is for Energy

Introduction

This activity introduces students to some of the energy sources including:

- The sun
- Coal
- Wind
- Water
- Fire

Activity

Print out the 'E' for energy student worksheet.

Find the letter E on the activity sheet. Practice writing energy and colour in the diagram.

Simple diagrams on the activity sheet represent different sources of energy. Go through each of the diagrams and discuss:

- What the diagram represents?
- How does it relate to the energy?
- What are the colours might students use to colour it in?
